Clinical Trials Center

AGE Centrum s.r.o.
Zamenhofova 638/18
Olomouc, 779 00
Czech republic

Clinical trials center has been founded in 2011 as a privately owned medical facility. Our center specializes in conduction of clinical trials of humane medicinal products. Since our foundation we have participated on more than 50 clinical trials in various fields of specilization.

We are ready to offer the sponsors and CROs the best environment for conduction of their clinical trials in phases I. to III.

We are a professional medical organization focused on clinical research, that is able to provide the sponsors and CROs with:

- Experienced investigators in desired specializations,
- professional study team (study nurses, coordinators, data managers, recruitment specialists),
- carefully pre-selected patient population,
- environment tailored exclusively for conduction of clinical trials,
- provision of clinical trials quality management within the center,
- alert and effective communication with sponsors' / CROs' administrative representatives,
- quality of acquired data – effective data management in compliance with the protocol.

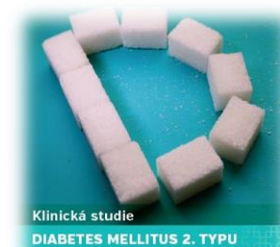

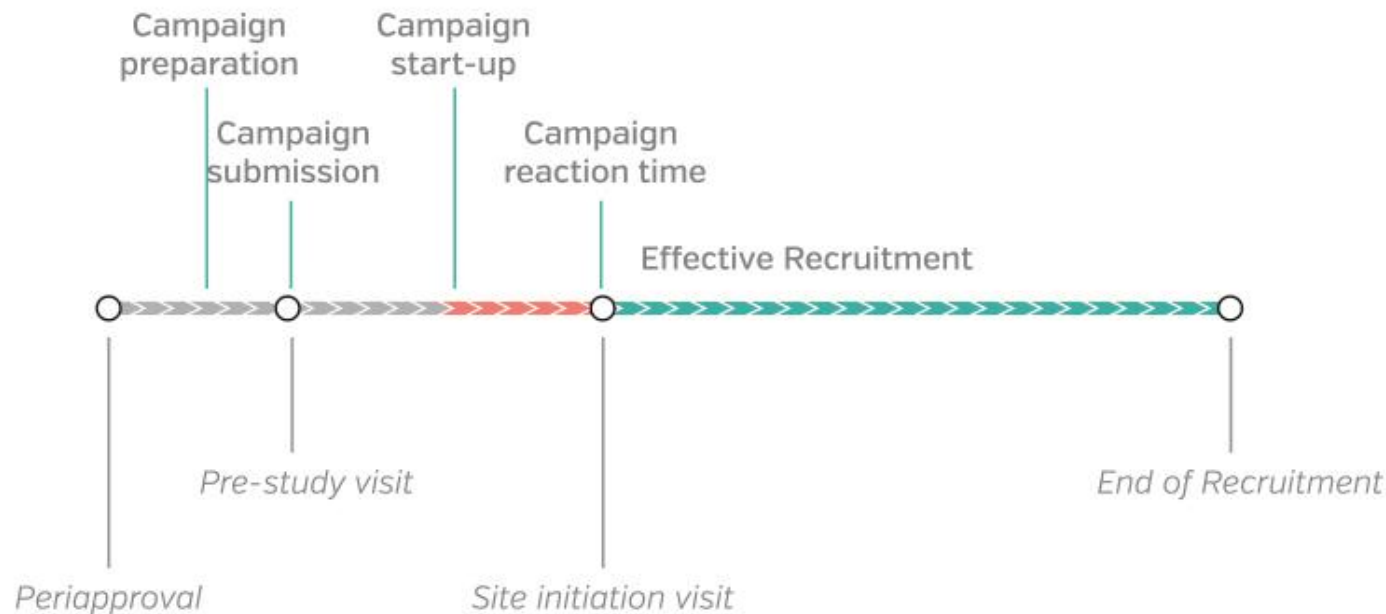

We focus on safe, effective, timely and client oriented services to patients, foremost through:

- Respect to patients values, preferences and expressed needs,
- comfort, coordinated and integrative care,
- clear, maximally comprehensible information provided to patients and their families,
- psychological support and elimination of concerns and anxiety,
- involvement of family members and caregivers, in cases where it is convenient,
- continuity of care, including communication with patients' own GP and/or other medical care providers.

Our center takes pride in very careful and active patient recruitment. We closely cooperate with a number of specialists and newly also with four significant hospitals in our region. Our center makes clinical trials accessible to patients of these professionals and facilities, without an excessive administrative burden.

We are very active on social networks and in mass media.

**Klinická studie
DIABETES MELLITUS 2. TYPU**

Diabetes je jedno z nejrozšířenějších civilizačních onemocnění na světě. Vědci a lékaři z celého světa vyvíjejí čím dál účinnější léky a snaží se prodloužit zhoršení průběhu nemoci a nežádoucím účinkům léčivých preparátů, jako je například přibývání na hmotnosti.

Podmínky účasti ve studii:

- Věk 18–65 let,
- diagnostikovaný diabetes mellitus 2. typu,
- pacienti léčení se Metforminem, pro které je tato léčba nedostatečná.

Informace ke klinické studii:

- Pouze 15 míst,
- návštěva v centru pouze jednou za měsíc,
- kompenzace cestovních výloh a času,
- nadstandardní péče a stálý zdravotní dohled.

Vaše dotazy Vám rádi zodpovíme na tel.: +420 774 700 274

**Klinické hodnocení
REVMATOIDNÍ ARTRITIDA**

Rheumatoidní artritida je chronická, zánětlivá a autoimunitní onemocnění. Nejčastěji se o onemocnění kloubů, ale o onemocnění vlastního imunitního systému s následným postižením kloubů a jiných struktur pohybového aparátu. Jednou z nejúčinnějších metod terapie se v současnosti ukazuje tzv. biologická léčba, která je však velmi nákladná, a proto je dostupná zvláště pacientům v pokročilem stadiu onemocnění.

Podmínky účasti ve studii:

- Věk 18–70 let,
- diagnostikována reumatoidní artritida,
- léčba metotrexátem v dávkě minimálně 15 mg týdně s nedostatečnou odezvou na tuto terapii nebo alespoň 7,5 mg týdně, pokud jste u vyšších dávek metotrexátu měli nežádoucí účinky,
- podepsání informovaného souhlasu,
- ochota dostavovat se v rámci studie na plánované návštěvy, dodržovat léčebný režim, podstupovat laboratorní testy a další procedury, které vám zkusíme doporučit.

Informace ke klinické studii:

- V tomto klinickém hodnocení budete zapojeni po dobu zhruba 6 měsíců,
- celkem absolvujete 16 návštěv,
- studijní léčivo je injekčně aplikováno jednou týdně,
- finanční kompenzace času a cestovních výloh.

Vaše dotazy Vám rádi zodpovíme na tel.: +420 774 700 274

Who are our employees?

- Fully licensed specialists in specific fields of health care,
- qualified, certified and experienced workers,
- fluent English speakers,
- professionals ready to provide full cooperation to sponsor/CRO representatives,
- people who enjoy clinical trials.

GCP

GMP

IATA

What are the roles of our skeleton staff?

- Principal investigators (board certified, specialists of the field)
- Sub-investigators (board certified, mostly internists),
- Study nurses,
- Data managers (eCRF specialists),
- Study coordinators,
- Recruitment specialists (marketers, social media, press)
- QA manager.

Our experience in clinical trials since 2011:

Psychiatry:

- Schizophrenia (III. phase)
- Alzheimer's disease (II./III. phase)
- Alcohol abuse (I. phase)
- Depressive disorder (II. & III. Phase]

Rheumatology:

- Rheumatoid arthritis (II. / III. phase)
- Ankylosing spondylitis (III. phase)
- Psoriatic arthritis (II./III. phase)
- Osteoarthritis (III. phase)

Dermatology:

- Antimycotic th. (II. phase)
- Lupus vulgaris (III. phase)
- Atopic dermatitis (II. / III. phase)

Neurology:

- Epilepsy (I./III. phase)
- Low back pain (II./III. phase)
- Migraine (III. phase)
- Neuropathy (III. phase)

Gastroenterology:

- Crohn's disease (II./III. phase)
- Ulcerative colitis (II./III. phase)

Diabetology etc.:

- Diabetes 2. type (III. phase)
- Hypercholesterolemia (III. phase)

Vaccination.:

- Meningitis (III. phase)

We are always ready to provide sponsors and CROs with quick response to their demands.

Our approach to feasibilities is realistic and critical of centre's capabilities.

We are flexible in specializations. We have a supply of specialists – investigators in various therapeutical areas.

We have our own LEC and contracting doesn't take ages.

Do not hesitate to approach us with your offers – we would love clinical trials in fields we have experience with and also in imunology, alergology or dermatology.

malota@ctcenter.cz

Site equipment:

- Centrifuge (ambient)
- Incubator (quantiferon test)
- ECG (incl. P wave)
- Infusion pump
- Infusion stationary (5 pts. capacity)
- Monitored IMP fridges (2-8°C)
- Monitored freezers (-20 °C)
- Monitored, fireproof IMP storage
- Monitoring room with Wi-Fi, multifunction printer
and coffee machine 😊
- Archive

External services:

- X-ray (on-site)
- MRI
- PET
- CT
- Gastroenterological facility
- X-ray pulmonolgy (off-site)
- Lumbal puncture
- Local lab
- and more...

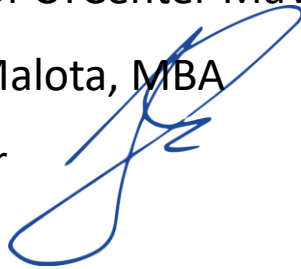

We are looking forward to potential cooperation and we invite you to visit our facility.
